## How can I install Stride Academy as a web app on my iPad?

To install Stride Academy as a web app on your iPad, first use Safari to go to [www.stridestart.com](http://www.stridestart.com). Once you are there, a pop-up message will appear asking you to install this web app on your iPad, and add it to your Home Screen for easy access. **PLEASE NOTE that when you install Stride Academy as a web app on your iPad, you will still need an internet connection in order to login and access the program.**

**This “web app mode” is the preferred method of logging in to Stride Academy on iPad and all tablet devices, for the best audio performance and memory/bandwidth management.**

In fact, if you are not hearing automatic audio/voiceover on your tablet in grades PreK-2, you need to install Stride Academy as a web app rather than using your browser to access [www.stridestart.com](http://www.stridestart.com). Other tablet devices besides iPad may have different instructions for installing a web app or icon to the home screen. Please consult the Help documentation for your tablet.
